Abstract: This article highlights aspects such as increasing the role of pedagogues in the public education system and society, creating the necessary conditions and facilities for their work, and increasing the role of teachers in society.

Key words: pedagogue, society, public education, education, technology, knowledge, skill, qualification.

Ways to improve the role of pedagogues require a multifaceted and systematic approach. Any initiative in this regard will give a positive result, because improving the quality of education means improving the role of pedagogues. Therefore, it is necessary for the state, society and educational institutions to work together and create the necessary conditions for pedagogues. The system of public education plays an important role in the development of every society. Pedagogues are at the center of the educational process. Their knowledge, skills and abilities determine the future of society. Therefore, the issue of increasing the role of pedagogues has been and should be in constant attention.

1. Support for professional development: regular updating of knowledge and skills of teachers will serve to increase the quality of education. In this regard, it is appropriate to implement the following measures:

-training courses: organization of courses aimed at teaching modern pedagogical technologies and innovations;- practical seminars and trainings: providing teachers with the opportunity to strengthen their knowledge and learn modern methods;

-Scientific research activities: encouraging teachers to engage in scientific work and creating ways to expand their creative capabilities.

2. Improving the incentive system: material and moral incentives for teachers increase their interest in their work. Teachers' salaries should be commensurate with their work. It is necessary to select them through programs such as determining the best teacher of the year. Additional opportunities can be created in the use of housing, transport and other services.

3. Raising the reputation of pedagogues: raising the status of pedagogues in society helps to strengthen their professional activity. In this regard, promoting the culture of respect for pedagogues in society, covering their activities through the media, informing the general public about the achievements and activities of teachers ,includes a wide celebration of teacher's days. Through this, they feel that they have their own value in society.

4. Use of technological opportunities: modern information and communication technologies are an important tool for improving the quality of education. The teacher should make extensive use of electronic educational resources, online platforms and digital textbooks, distance learning opportunities, development of distance teaching methods for educators, improvement of IT skills, etc. should be able to use tools. Teachers need to be taught modern programs and technologies.

5. Psychological and social support: pedagogues face various psychological and social problems during their work. In order to solve them, it is necessary to establish psychological support centers, develop stress reduction programs, create an atmosphere of cooperation, and create a basis for exchange of experience and support between pedagogues.

6. Reforming the education policy: paying special attention to the education system at the state level will help to effectively organize the activities of pedagogues. Updating educational standards, introducing programs that meet modern needs, improving the pedagogical activity control system, creating opportunities for teachers to study international experiences. contains.

To improve the role of educators, it is important to develop practical and systematic measures, not limited to theoretical recommendations. Below are additional directions and methods:

1. Introduction of innovative approaches, integrated methods, making students gain a broad worldview by teaching subjects in an interdependent manner, STEAM (Science, Technology, Engineering, Arts, Mathematics): through the development of innovative teaching methods "increasing students' creative and analytical thinking abilities, Gamification: refers to increasing interest among students and pedagogues by introducing game elements into the educational process.

2. It is necessary to improve the environment in educational institutions, to create favorable conditions for the effective work of the pedagogue. Modernization of educational facilities, provision of classrooms with modern equipment, pedagogical laboratories, creation of special places for experimenting and testing new methods, libraries and It is necessary to create resource centers for teachers. Fully equipped libraries should be established to expand the opportunities for teachers to acquire knowledge.

3. The development of collective cooperation, opportunities for pedagogues to exchange experiences accelerate their professional growth. It involves expanding the activities of teachers' clubs and associations, organizations uniting pedagogues. Regional and international conferences play an important role in introducing pedagogues to world experience. The mentoring system involves training and guiding young teachers with the help of experienced professionals.

In short, increasing the role of pedagogues in public education not only increases their professional development, but also increases the intellectual and cultural potential of the entire society. In this direction, the state, society and educational institutions should work together. In this way, it is possible to improve the quality of education and the status of pedagogues.
