

**SOCIETY WILL NOT DEVELOP IF CULTURE AND ART DO NOT PROGRESS**

**Yorqulova Mokhinur**

Student of the 3rd stage of the State Institute of Art and Culture of Uzbekistan

**Abstract:** Culture and art play an important role in the development of every society. They help to make changes not only aesthetically, but also in the economic, social and political spheres. Culture is formed through the values, customs, language and traditions of society, and art serves as an important tool in expressing the human spirit, creating beauty in society, and promoting new ideas. If culture and art do not develop, the general development of society may stop. This, in turn, has a negative impact on social justice, population well-being and a change in worldview. This article also analyzes the role of culture and art in the development of society, its socio-economic impact and its importance for development.

**Key words:** Culture and art, society, national traditions, renaissance, value, creator.

The idea that society cannot develop without the development of culture and art is very important and deeply important. These words refer to the place of cultural and artistic spheres that influence the social, economic and political development of society. Culture and art are the main foundation of society, they form harmony, equality, moral values and spiritual wealth among people.

Culture is the common heritage created by mankind in different eras, it consists of language, customs, values, history, religion, literature and other cultural elements, and shapes the way of thinking and life of every member of the society. In a society where culture is not developed, moral standards and communication between people, as well as common goals, may disappear. Fields such as education, art, literature and science play a major role in the development of culture.

Art is a means of expressing people's inner world, feelings and worldviews, and forms aesthetic values in society. Art, in turn, preserves national and universal history, culture and high human feelings and helps to use them. The development of art is necessary for freedom, creative thinking and exchange of new ideas in society. The rise of art has a positive effect on society not only aesthetically and spiritually, but also economically.

President Shavkat Mirziyoyev had a meeting with industry leaders on December 22, 2023. Priority tasks for all sectors were discussed at the meeting. The head of our state expressed his opinion in 9 directions and put forward important initiatives. First of all, it was emphasized that it is necessary to develop a separate programmatic document on the development of our national idea, which serves as a methodical basis for the field of spirituality and culture. The attention paid to the education system will be continued consistently. In this regard, it was emphasized that the provision of equality, especially the education and occupation of girls, is important for the development of the society. Proposals were made to improve the quality of education in the field, to increase the salaries of teachers of music and art schools, and to cover the utility costs of these schools from the budget. The responsibility of governors in the cultural and educational sphere will be increased. Centers of Spirituality and Enlightenment will be launched in districts and cities.

The level of development of our people depends on the national culture. In this sense, culture is the image of our people and society. As we are starting to create a new image of Uzbekistan, we must first start with the development of our national culture.

Decision PQ-3391 of the President of the Republic of Uzbekistan of May 26, 2022 "On measures to further increase the role and influence of the sphere of culture and art in the life of society". Any industry cannot develop independently in isolation from others. Today in Uzbekistan, the development of national culture and art is considered as an integral and integral part of the socio-economic development of the country. After all, culture and art are extremely important and sensitive areas for the development of the nation. Because this field educates feelings that directly affect the heart of the society and move to its wishes.

Culture and art is such a comprehensive field that it combines systems that do not repeat each other, are not similar to each other, and require independent creativity. The President's Decree took into account the interests of every aspect of this large-scale field and determined important measures so that their full expression in life would be the basis for the development of culture and art in a strong harmony like a chain. Iadi It is known that there are many young talents in our country. The fact that it occurs in many cases is the reason why young people post their creations on social networks and websites, and some of them are recognized and applauded by the general public. This is certainly good, but it is not sufficient for the promotion of their creative activity.

Because culture is not a toy, culture is the pillar of the whole country. No other field can introduce the country to the world in the field of culture and art. We can learn about the future of this

country depending on the culture. Similarly, we support every type of culture that enters through social networks such as mass culture, instagram, you follow, facebook social networks. we should not see.

Today, 837 cultural centers operate in our republic, and they serve as the main foundation for the development of amateur art. There are a total of 4,522 clubs in these cultural centers and 52,970 amateurs are working in them. 37,340 of them are young people. Also, there are 482 teams with national amateur titles in cultural centers, and more than 5,000 amateurs participate in these teams. In this sense, it is important to improve the activities of cultural centers and create the necessary conditions for them. To date, 367 cultural centers have been repaired and put into use. The development of culture and art also affects the economy. New art forms and cultural activities promote tourism, create new jobs and stimulate economic activity. Cultural industries (film, music, art galleries, etc.) play a major role in this. Culture and art are a force that harmonizes different areas of society. If culture and art do not develop, the society may lose its internal values, lag behind development and not get acquainted with new ideas. Thus, culture and art are necessary for the spiritual and social development of society, and the development of these two spheres leads to the rise of all spheres of society.
